# Mohammad Ifaz Alamgir

Software Engineer | AI & Backend Systems
Dhaka, Bangladesh | +880-1747-572247 | ifazalamgir7@gmail.com | LinkedIn | GitHub | Portfolio

## Education

**BRAC University** Sep 2022 – Jun 2026
*Bachelor of Science in Computer Science – CGPA 3.90/4.00, Highest Distinction* *Dhaka, Bangladesh*

**Chattogram Cantonment Public College** Jul 2019 – Dec 2021
*Higher Secondary Certificate (HSC) – GPA 5.00/5.00* *Chattogram, Bangladesh*

## Relevant Coursework

- Data Structures & Algorithms
- Software Engineering
- Database Management
- System Design
- Artificial Intelligence
- Computer Networking
- Natural Language Processing
- Blockchain

## Experience

**Metaora** Aug 2026 – Present
*Software Engineering Intern* *Remote*

- Built, tested, and tuned Retell voice agents for multiple clients, each with its own agent, using live calls and transcripts to find issues, patch behavior, and retest each fix on dev and staging.
- Developed and merged full-stack features in React, Node.js, and PostgreSQL on dev and staging, tested the website, and raised 20+ issues with clear reproduction steps while working directly with the team lead.

## Projects

**Shomadhan** | *React.js, Node.js, Express.js, MongoDB, JWT, Leaflet.js* GitHub | Live Demo | Mar – May 2026

- Built and deployed a full-stack MERN civic complaint platform with NLP auto-classification, SLA monitoring, geographic duplicate detection, real-time notifications, and PDF analytics across three user roles.
- Scored **97 on Lighthouse performance** and **100 on Best Practices**; tested the platform end to end across all three user roles and designed the role-specific REST API contracts independently.

**ShastoSheba** | *React, TypeScript, Node.js, Express, MongoDB, Twilio Video, Google Gemini* GitHub | Feb – May 2025

- Engineered a full-stack telehealth platform with real-time video consultations, mobile banking payment verification, AI-assisted health guidance, and automated medication reminders.
- Prevented double-booking through atomic database updates and strengthened authentication with rotating JWT refresh tokens and reuse detection; validated critical backend workflows with 264 tests across 15 Jest suites.

**EchoMinutes** | *Python, Whisper, LangChain, RAG, ChromaDB, Streamlit* GitHub | Live Demo | Jun 2026

- Built a pipeline that transcribes recordings, routes Bangla/Hindi audio to a regional speech API, and extracts summaries, action items, and key decisions via a LangChain map-reduce chain.
- Implemented a transcript-grounded RAG chat (sentence-transformer embeddings, ChromaDB) with a fallback for out-of-scope queries.

**Freelance Market Escrow** | *Solidity, Truffle, Ganache, MetaMask, React.js, Web3.js* GitHub | Dec 2025

- Built an Ethereum escrow marketplace in Solidity with locked-fund payments, reverts on incorrect Ether amounts, a tiered platform fee (2% under 1 ETH, 1% above), reputation-gated bidding, and Arbiter-only dispute resolution; tested on a local Ganache network with Truffle.

**Credit Card Fraud Detection** | *Python, Scikit-learn, SMOTE, Pandas, Matplotlib, Seaborn* GitHub | Aug 2025

- Built an end-to-end ML pipeline on 1.2M+ transaction records (preprocessing, SMOTE, feature engineering), reaching an **82% F1-score** and **85% ROC-AUC** with a Random Forest classifier validated against train/test leakage.

## Research

**Hallucination Detection in Bangla LLM Output** | *Undergraduate Thesis* GitHub | May 2025 – Jun 2026

- Extracted a 363-feature representation (352 layer-wise attention features from all 32 layers of LLaMA-3-8B) across approximately 3,000 Bangla QA samples to detect hallucinations from internal signals.
- Achieved **AUC 0.817** and **77.0% accuracy** by combining attention with logit-based uncertainty, outperforming conventional output-based verification for low-resource Bangla NLP.

## Technical Skills

**Languages**: Python, JavaScript, TypeScript, Java
**Frontend & Web**: React.js, HTML5/CSS3
**Backend & DevOps**: Node.js, Express.js, REST APIs, Docker, CI/CD
**Databases & AI/ML**: PostgreSQL, MongoDB, MySQL, ChromaDB, Scikit-learn, Pandas, LangChain
**Developer Tools**: Git/GitHub, Postman, Jira, Retell, Claude Code

## Achievements & Certifications

**1st Runner-Up**, CSE471 System Analysis and Design Project Showcase 4.0: Shomadhan, selected among 120 submissions
**DataCamp (2026)**: Data Manipulation in Python, Pandas, NumPy, Cleaning Data in Python | GitHub
**LeetCode**: 250+ problems solved; 100 Days Badge; Top 50 SQL Practice Set | Leetcode
