Mohammad Ifaz Alamgir

Software Engineer

Dhaka, Bangladesh | +880 1747572247 | ifazalamgir7@gmail.com | github.com/ifaz07 | linkedin.com/in/ifaz-alamgir

Professional Summary

Recent Computer Science graduate (BRAC University, GPA 3.90/4.0) with hands-on experience building and deploying backend services and RESTful APIs across RactJs, Node.js, Express.js, and Laravel. Comfortable designing relational and NoSQL database schemas, MySQL, MongoDB), implementing authentication and authorization, and integrating third-party services. Eager to contribute to SAAS projects and grow under experienced engineering mentorship.

Education

BRAC University Sep 2022 – Jun 2026
Bachelor of Science in Computer Science Dhaka, Bangladesh
GPA: 3.90/4.0 Coursework: Software Engineering, Database Systems, Algorithms, System Analysis and Design

Skills

Web Development: ReactJs, Node.js, Express.js, REST APIs

Programming Languages: Python, TypeScript, JavaScript

Databases: MySQL (schema design, complex joins, query writing), MongoDB

Tools: Git, Github, Docker (basics), Kubernetes

Core Concepts: Data Structures and Algorithms, Agile/Scrum fundamentals, SDLC, Technical Documentation

Projects

Shomadhan – AI Based Civic Issue Tracking System GitHub | Live Demo
React.js, Node.js, Express.js, MongoDB Mar – Apr 2026

- Built role specific REST APIs for a full stack MERN civic complaint platform, including duplicate detection logic via geographic proximity analysis and PDFKit based analytics reporting.
- Designed the MongoDB schema and real time notification system across three user roles.
- Achieved Lighthouse scores of 97 Performance, 100 Best Practices, and 91 SEO (CLS: 0.03) on the deployed build.

EchoMinutes – AI Meeting Assistant GitHub
Python, LangChain, ChromaDB, Streamlit June 2026

- Built the backend pipeline for an AI meeting assistant, integrating Whisper transcription, a map-reduce LangChain summarization chain, and a retrieval-augmented chat feature.
- Designed the data flow connecting transcript embedding (ChromaDB), multiple LLM extraction passes, and session export functionality.

Decentralized Freelance Marketplace – Blockchain DApp GitHub
Solidity, Ethereum, Web3.js, MetaMask Mar – May 2025

- Built a decentralized freelance marketplace on Ethereum with Solidity smart contracts handling escrow payments and a bidding system.
- Developed role based dashboards with MetaMask wallet integration for transaction signing.

MediChain – Integrated Healthcare Platform GitHub
Laravel, PHP, MySQL, Twilio Video API Sep 2024 – Jan 2025

- Implemented transaction safe booking with row level locking to prevent double booking, integrated with Twilio Video for telemedicine.
- Designed a normalized MySQL schema across patients, providers, appointments, and bookings with analytical query support.

Research

Hallucination Detection in Bangla LLMs – Undergraduate Thesis GitHub
Python, BERT, mDeBERTa, LLaMA 3, NLI May 2025 – June 2026

- Designed a hybrid verification pipeline combining multiple ML signals to detect hallucinations in Bangla LLM outputs across QA, summarisation, and translation tasks.
- Benchmarked multiple LLaMA-family models across 9,000 evaluations.

Certificates and Achievements

LeetCode: 50+ Day Badge – consistent daily problem solving streak; 200+ DSA problems solved across major patterns.

Deloitte Australia Technology Job Simulation (Forage, 2026): Coding and technology track covering structured problem solving in a technology consulting context.

DataCamp (2026): Data Manipulation in Python, Cleaning Data in Python, Introduction to NumPy View on GitHub

Dean's List, BRAC University: Multiple semesters, GPA 3.90/4.0
